

RAVE PANIC BUTTON™

EDUCATIONAL STAKEHOLDERS

Faster Emergency Notifications ■ Staff Alerts ■ Better Communication

What is Rave Panic Button?

Rave Panic Button is an alert system that provides notification to school-based staff, Police, Fire and EMS First Responders and 911.

The Rave Panic Button app delivers critical response data to 911 and First Responders, giving them tools to coordinate a faster and more effective response to schools.

Administrators and school-based employees will be notified when an emergency incident requiring a public safety response occurs in the school. A school representative will maintain the panic button profile to ensure the right individuals are alerted at the right time.

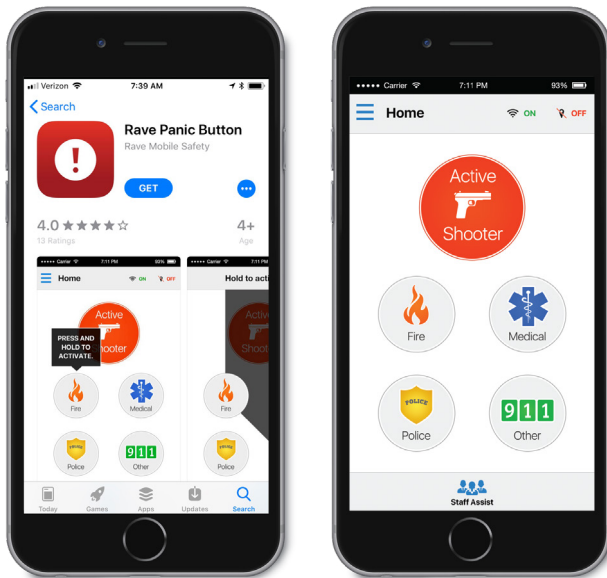

How Can I Ensure My School is Prepared?

Rave has been working diligently with your Public Safety Agencies, School and County Officials to set up your school's profile, which includes floorplans and building geofencing data.

We need your help to complete the process.

Here's how you can help:

- Assign a person(s) on your staff to be the School Panic Button Liaison, who will be trained by Rave on maintaining profile information.
- Provide names and mobile numbers of Principals and key school stakeholders that you want to receive alerts for incidents.
- Contact your school leader or emergency response POC to coordinate response to various panic button scenarios.
- Ensure your staff is aware of the Panic Button and knows what to do once they receive an alert.

How can I download Rave Panic Button?

You have the option to download the app on your personal phone or work phone through iTunes or GooglePlay. Please be sure you provide the phone number you want registered to the School Panic Button Liaison, so it can be included in your school's profile. You will be notified when to download the Panic Button App for enrollment.
